

Subtraction (A)**WEEK 6****Your mission:**

You have to plan a food budget using \$50. The food is to feed 1 person for one week.

Mission Rules:

- You should buy healthy options.
- Think about buying “in bulk”
- You cannot buy more than 2 of the same type of item
eg. 2 packets of Twisties, and 2 packet of Burger Rings = 4 packets of chips ✘
1 packet of Twisties and 1 packet of Burger Rings = 2 packets of chips ✔
- You can work with another person. In life we can live with other people and share the cost of food. If you do this, that means you have \$100 to spend, but REMEMBER you then have to budget to feed 2 people for a week.
- You must use the attached Coles Supermarket catalogue as your price reference.
- You need to initially estimate your spending, by using a range of subtraction strategies to analyse your spending.

**You will be handing into your teacher:**

- A draft itemised shopping list, with the prices noted; and
 - o You will need to show that you have added this up without a calculator (yes, it means showing your working!).
 - o Note and corrections that you may need to make. If you need to remove items off the list, please write and summary on this, and recalculate.
- A final itemised shopping list, which is within your budget.
